Nationality: Angolan

Results-driven operations professional with 7+ years of experience in team leadership, process optimization, and vendor management across IT, construction, and healthcare sectors. Currently completing advanced certification in Project Management with specialized training in Supply Chain Operations and Quality Management. Proven track record supervising teams of 50+ users, and optimizing workflows to improve efficiency and reduce costs. Seeking to leverage cross-functional coordination experience and analytical skills in a dynamic logistics environment.

Work Experience

Technical Support Coordinator | Concentrix Services Portugal

Lisbon, Portugal (Remote) | April 2024 – Present

- Coordinate incident management lifecycle, tracking service requests from initiation through resolution while maintaining quality standards.
- Analyze operational data to identify trends, assess performance metrics, and recommend process improvements.
- Ensure compliance with data security protocols and ISO requirements in service delivery.
- Manage customer relationships through complex technical issues, ensuring satisfaction and adherence to service standards.

IT Operations Consultant | Globus - Consultoria Global

Luanda, Angola (Remote) | October 2023 – November 2025

- Managed end-to-end project lifecycles from feasibility studies through implementation for multi-million dollar client initiatives, ensuring alignment with business objectives and budget constraints.
- Coordinated vendor relationships and supplier negotiations for infrastructure deployment, optimizing procurement processes and reducing operational costs.
- Developed comprehensive project proposals, including requirement analysis, cost estimation, risk assessment, and resource allocation.
- Supervised brand identity and digital asset management projects, ensuring quality standards and timely delivery across cross-functional teams.
- Implemented Agile/Scrum methodologies to streamline workflow processes and improve team productivity.

Key Achievement: Led feasibility studies and proposal development for large-scale infrastructure projects, coordinating between technical teams and client stakeholders to ensure scalable solutions.

Operations Team Lead | ENOV Technologies (Autisync)

Windhoek, Namibia (Remote) | October 2019 – October 2025

- Supervised development and deployment teams, implementing Kanban and Agile methodologies to optimize project workflows and resource allocation.
- Managed Service Level Agreements (SLAs) and quality standards for client deliverables, ensuring compliance with performance metrics and deadlines.
- Coordinated domain management, hosting infrastructure, and digital asset deployment, overseeing inventory of technical resources and licenses.
- Improved operational efficiency by 30% through systematic project follow-up and process documentation.
- Contributed to talent acquisition and training programs, coaching team members on quality standards and time management.
- Served as primary liaison between clients, designers, and technical staff to resolve operational issues and ensure customer satisfaction.

Key Achievement: Successfully managed remote teams across multiple time zones while maintaining quality control and meeting aggressive project timelines.

IT Infrastructure Supervisor | Omatapalo Engenharia & Construção

Lunda Norte, Angola | October 2022 – October 2023

- Established comprehensive IT infrastructure for construction site including offices, cafeteria, residential quarters, and surveillance systems, coordinating logistics for limited resources in remote location.
- Supervised IT support operations for 50+ end-users, managing hardware/software inventory, procurement, and asset tracking.
- Developed and maintained relationships with equipment suppliers and service providers, negotiating contracts and managing delivery schedules.
- Generated managerial reports on system performance, inventory status, and operational budgets.
- Implemented Kanban systems for efficient task management and resource allocation.
- Ensured compliance with safety and operational standards across all IT installations.

Key Achievement: Built IT infrastructure from ground up in challenging environment, managing supply chain logistics for equipment delivery and coordinating with multiple vendors under tight deadlines.

Billing & Accounts Coordinator | Namibian Kidney & Dialysis Center

Windhoek, Namibia | March 2019 – February 2022

- Managed crediting and billing functions to ensure steady cash flow and accurate financial tracking across client accounts.
- Collaborated with cross-functional teams to resolve billing discrepancies and payment issues.
- Generated regular financial reports and updates for management, maintaining data accuracy and compliance standards.
- Utilized accounting software (Elixir) to track inventory of medical supplies and equipment costs.
